

# Statistical Genetics Programming Workshop

March 9, 10 on the UCLA Campus  
In conjunction with GAW 20

- This workshop will cover statistical genetics programming in the *OpenMendel* software, using the state-of-the-art *Julia* language designed for scientific computing
- The syllabus will cover both using *OpenMendel* for genetic analysis, and methods for extending the *OpenMendel* code for customized applications
- Intended for bioinformaticians and statisticians who want to customize their analysis of genetic data drawn from the study of complex traits
- Instructors will include faculty and scientists from UCLA and MIT
- Participants should have prior programming experience
